

IKHWAN RAMADHAN

JUNIOR FULL-STACK WEB DEVELOPER

ikhwn.rdn@gmail.com | +62 823-8647-3410 | [GitHub](#) | [LinkedIn](#) | [Website](#)

Padang, West Sumatra | Open for On-Site / Relocation

PROFILE

Bachelor's degree graduate in Informatics Engineering specializing in Frontend Engineering. Proficient in translating requirements into clean, responsive, high-performing, and maintainable user interfaces using React, Next.js, Angular, and TypeScript. Possesses strong stakeholder communication, problem-solving, ownership, and cross-functional collaboration skills, with a proven ability to translate non-technical business requirements into robust technical solutions.

EXPERIENCE

Full-Stack Web Developer (Intern)

Aug – Sep 2025

SMP Negeri 24 Padang • Padang, Indonesia

Website: smpn24padang.sch.id

- Spearheaded end-to-end development of the school's official website, from requirement analysis to production release.
- Engineered the frontend architecture using Next.js, implementing SSR, SSG, ISR, and Technical SEO to optimize performance and search engine indexability.
- Achieved Lighthouse scores of 99/100 for Performance, 100/100 for SEO, and 100/100 for Best Practices, delivering a First Contentful Paint (FCP) of 0.5 seconds.
- Liaised directly with school leadership and successfully delivered deployment on schedule within 2 months.

EDUCATION

Bachelor of Science in Informatics Engineering

2022 – 2026

Universitas Putra Indonesia "YPTK" Padang

PORTFOLIO / PROJECTS

Car Dealership Website – Full-Stack Web Developer

2026

Website: cars.ikhwann.my.id | Github: https://github.com/IngsR/web_store

Developed a car sales website featuring an integrated CRM system to manage customers, orders, and sales operations, including automated lead distribution to sales representatives. Core features include a vehicle catalog, loan simulator, sales dashboard, sales management, user authentication, database architecture, and deployment.

Stack: Next.js · TypeScript · PostgreSQL · Prisma · Tailwind CSS · JWT · Vercel

Tropical Cyclone Track Prediction – Full-Stack & AI Engineer

2026

Website: prediksi.ikhwann.my.id | Github: <https://github.com/IngsR/PrediksiSIklon-LSTM>

Engineered an LSTM-based tropical cyclone track prediction research platform featuring interactive geospatial visualizations and in-browser model inference powered by ONNX Runtime with Astro Island Architecture.

Stack: Astro · TypeScript · ONNX Runtime · LSTM · Geospatial UI

Real Estate Sales Website – Frontend Developer

Website: angular.ikhwann.my.id | Github: <https://github.com/IngsR/Angular-Property>

Developed a property search and simulation user interface utilizing Angular Standalone Components. Leveraged Angular Signals and RxJS to power a real-time interactive mortgage simulator and display 2D property floor plans.

Stack: Angular · TypeScript · Signals · RxJS · Tailwind CSS
